Subject: FYI: change made to one paragraph in the "updates" page

Hi everyone,

Per instructions from Lisa Lloyd and Melissa, I made a change on this page:

<http://www2.epa.gov/goldkingmine/updates-epas-response-2015-release-gold-king-mine>

If you expand the “August 8th” update, you’ll see that I changed a paragraph. It used to say this:

The Agency for Toxic Substances and Disease Registry (ATSDR) recommends that additional monitoring should be conducted until the river returns to pre-release levels. If local health care providers have questions they can contact the ATSDR Regional Office at 303-312-7013. ATSDR's Regional Office can arrange a consultation between the health care provider and ATSDR physician.

It NOW says this:

The Agency for Toxic Substances and Disease Registry (ATSDR) recommends that additional monitoring should be conducted until the river returns to pre-release levels. The San Juan Basin Health Department is working with the Rocky Mountain Poison Control and Drug Center (RMPDC). Public or health care providers that have questions should direct their calls to the RMPDC at 1-800-222-1222.

If you need anything else changed at all, let me know (email me or text or call me at the number below), and I’ll make the changes right away.

Thanks,

Tim Davis

Subject: Re: Very Important

Please send the changes. I'm looping in Tim Davis who can make changes to the website this evening.

The new web site says:

While excavating loose material that had collapsed into the cave entry, pressurized water began leaking above the mine tunnel, spilling about three million gallons of water stored behind the collapsed material into Cement Creek, a tributary of the Animas River

Is that accurate? I've not seen that before.
